The War That Killed Achilles
The True Story of Homer’s Iliad and the Trojan War

The scholar and narrative historian takes apart one of the timeless stories of Western civilization, revealing as its intended theme the tragic lessons of war.

“A nobly bold, even rousing, venture, a read-through of the Iliad, from beginning to end, always with a sharp eye to half a century of revealing scholarship….It would be hard to find a faster, livelier, more compact introduction to such a great range of recent Iliadic explorations.”—The New York Times

DONALD KAGAN

Thucydides: The Invention of History

Our greatest historian of the Peloponnesian War offers a reconsideration of Thucydides as the first modern historian, examining his methods chronicling that war, and exploring how his enduring work altered the way history has been conceptualized ever since.

“Kagan has produced what reads like the last word on the man, a nuanced and subtle account of a subject that has so often been treated in a spirit of high partisanship.”—The Wall Street Journal

“Erudite and freshly provocative….Less about the actual events of the past and more about how they get written up and embalmed for posterity.”—The Washington Post

Lords of the Sea
The Epic Story of the Athenian Navy and the Birth of Democracy

The renowned archaeologist presents the definitive history of the first dominant navy and how it engineered a civilization, empowered the world’s first democracy, and led a band of ordinary citizens on a voyage that altered the course of history.

“To provide a new angle from which to view and understand the experience of the Athenians of the Classical age is a remarkable feat, but Lords of the Sea accomplishes just that….The writing is utterly captivating and makes the reader feel he is back in ancient Athens.”—Donald Kagan, author of Thucydides

Virgil

The Georgics: A Poem of the Land
Newly Translated with an Introduction and Notes by Kimberly Johnson

Virgil’s celebration of the natural world is now available in a dual-language edition with a new translation.

“Georgic” means “to work the earth,” and the The Georgics combines practical wisdom on tending the land with exuberant eulogies to the rhythms of nature. It is at once a reflection on the cycles of life, death, and rebirth; an argument for the nobility of labor; and an impassioned reflection on the Roman Empire.

PLATO

The Last Days of Socrates
Newly Translated with an Introduction and Notes by Christopher Rowe

Plato's account of Socrates' trial and death—condemned to suicide—in 399 BC represents a significant moment in Western literature as well as a watershed in the life of ancient Athens.

In these four dialogues, Plato develops the Socratic belief in responsibility for one's self: in *Euthyphro*, Socrates debates goodness outside the courthouse; *Apology* sees him in court, rebuffing all charges of impiety; in *Crito*, he refuses an entreaty to escape from prison; and in *Phaedo*, Socrates faces his impending death with calmness and a skillful discussion of immortality.

The Histories
Translated by Kenneth Wellesley
Revised with a New Introduction by Rhiannon Ash

In AD 68, Nero's suicide marked the end of the first dynasty of imperial Rome. The following year was one of drama and danger, with four emperors—Galba, Otho, Vitellius, and Vespasian—emerging in succession.

Based on authoritative sources, The Histories vividly recounts the details of the “long but single year” of revolution that brought the Roman empire to the brink of collapse.

On Architecture
Newly Translated by Richard Schofield
Introduction by Robert Tavernor

A new, illustrated edition of the foundational work on architecture, engineering, and urban planning.

The only treatise on architecture to have survived from Roman times provides a fascinating picture of how the Romans planned and built their great structures and cities by laying out all the information an architect of the time needed—from plans for temples, public baths, government buildings, and private homes to the best materials and techniques for building.

On Architecture also introduces longstanding principles of architecture, from the use of nature's harmonies in design to the ideal modular proportions of the human body, which later inspired Leonardo da Vinci.
