Train: Riding the Rails That Created the Modern World—From the Trans-Siberian to the Southwest Chief

“Graham understands from the motors that whir and slide to the tapped rhythms of the rails, and from stations: the busy-ness and the cheer—can shape the world as we understand it.” —The New Yorker

The Way to Go: Moving by Sea, Land, and Air

Over the last century, the world has come to rely on its ability to move just about anywhere effortlessly. We ride in cars and on buses and trains to work; enjoy food shipped from across the globe; and travel for leisure to distant shores and far-flung destinations. But Leigh Gallagher’s well-researched and provocative new book reveals the highly complex and largely invisible logistics that connect us to the rest of the planet. Where the American Dream Is Moving

The Heights

“Zoellner illustrates how the modern era was ushered in and strapped in place by rail projects of the past have grown out of particular cultural and political circumstances. Starting with the Greco-Roman geographer Ptolemy and ending with—inevitably—the Google Earth, [Professor Brotton] explores the ways in which some of the greatest map ping projects of the past have grown out of particular cultural and political circumstances. He even goes on to argue that it is precisely the social and political settings in which maps were developed that shaped the nature of human culture since ancient times.” —NPR.org

A fascinating collection of the most significant plans, sketches, drawings, and illustrations that human beings have ever created. From the earliest cave paintings to Leonardo da Vinci’s Vitruvian Man to the innovation of the iPod, they chronicle the key aspects of the human experience. A Mind-Expanding Exploration of the Way the World Looks

The Map Thief: The Gripping Story of an Esteemed Rare-Map Dealer Who Made Millions Stealing Priceless Maps

Once considered a respectable antiquarian map dealer, E. Forbes Smiley spent years doubling as a map thief. Dealer Who Made Millions Stealing Priceless Maps

The Map Thief

“Simons explores the stories behind the plants and flowers he collected, and weaves them into a saga that is at once a vivid adventure and a serious portrait of the high-stakes criminal and the inside story of the industry that consumed him.” —The Telegraph (UK)

The Map Thief

“A collection of marvelous anecdotes that explore the role maps have played in shaping the Western world over the past five centuries.” —The New York Times

The World Until Yesterday

“The End of the Suburbs

“Leigh’s vision of suburban life is a broad-brush portrait, but it is a vivid one, and it is backed by a careful reading of the evidence.” —The New York Times

Jared Diamond

The World Until Yesterday

What Can We Learn from Traditional Societies?

“By focusing his infectious intellect and incredible experience on nine broad areas—peace and war, young and old, danger and response, religion, language and health—and sifting through thousands of years of customs across 39 traditional societies, Diamond shows us what we can learn from looking back through time.” —The New Yorker

What Can We Learn from Traditional Societies?

Jared Diamond

The World Until Yesterday

A fascinating look at the rise and fall of our great late nineteenth-century inventions known as ‘just-in-time’, including the onomatopoeic lines that once occupied space in our homes and offices and defined our culture, and the impact of Le Cailleau’s famous ‘oratime’ formula for a happy life.

Trans-Siberian to the Southwest Chief

“A collection of work by Nellie Bly, the first and best of the gutsy late-nineteenth-century journalists known as ‘girl stunt reporters,’ including the travelogue from her record-breaking 1889 trip around the world without a chaperone.” —The New York Times

A ROGUE SOCIOLOGIST LOST AND FOUND IN NEW YORK’S UNDERWORLD ECONOMY

Sudhir Venkatesh’s Floating City is a rogue sociologist’s lost-and-found story from Manhattan’s streets. It’s a rich story of neighborhoods that have been transformed by capitalism, from the Lower East Side to Bed-Stuy. It’s a story of powerful and moving individuals who struggle to navigate that new world. It’s a book that will make you think about the city and the power that make it tick. It’s a book about the choices people make and learning to live with the results. It’s the story of a city that has been transformed by capital, but that still hasn’t been transformed by the people who live in it. It’s the story of a city that has been transformed by capital, but that still hasn’t been transformed by the people who live in it.
NEW TITLES IN GEOGRAPHY

WILLIAM ROSEN
The Third Horsecracker
Climate Change and the Great Tumult of the 14th Century
Rosen unearths Crusader-era climate predictions and analyses, regimes of social transformation, and cultural patterns. His narrative combines the latest in climate science and historical scholarship to build a global picture of 14th-century livelihoods and human response to climate change over the course of generations.

SUDHIR VENKATESH
Floating City: A Rogue Sociologist Lost and Found in New York’s Underground Economy
Using long-form ethnographic research and a wealth of newly translated documents, Venkatesh introduces us to the urban metropolis as it was then and as it is now. It is a story of Fort Nonsense, an integrated system of vegetable, grain, and livestock production. Drawing on the wisdom and experience of chefs and farmers from around the world, Venkatesh sheds light on the questions of food sovereignty and sustainable urban food production in the twenty-first century.

THOMAS M. ADDISON
In the Shadow of della Rovere: The Forgotten Family Behind the Papacy
The story of della Rovere is both an epic work of twentieth-century history delivered through the riveting story of one extraordinary Jewish family with roots in Eastern Europe and branches across three continents. Three Journeys into the Heart of the Twentieth Century

NICHOLAS WADE
A Troublesome Inheritance: Genes, Race and Human History
Wade explores the science and politics of race and human history, tracing how and why the human population differentiated into distinct races.

THOMAS DYJA
The Third Coast: When Chicago Built the American Dream
Chicago was once far more than just a romantic tourist destination. Madden’s book is an intimate portrait of Delhi.
